## **Learn to Speak Norwegian: Volume 11**

Examples include the application of the residence time concept Danckwerts, developed in chemical engineering to ventilation efficiency Sandberg, and the application of CFD originally developed for the aerospace industry Nielsen, Contribution of the ventilation community to fluid mechanics and heat and mass transfer has also been evident, such as the development of non-isothermal jets Koestel, The ultimate goal of an in-depth understanding of fluid mechanics in building airflow is to provide engineers effective and efficient design and analysis tools. The distinctive characteristic of this work is a multidisciplinary approach that uses the Spanish Inquisition, the French Resistance, and the memory of the Holocaust to illuminate blind spots in Chinese memory and help define the difficulties of dealing with questions of memory.
